CSE Mattermost/Gitlab Login

Mattermost is a Slack-like messaging service; Gitlab is code collaboration software which allows you to manage git repositories. Both are hosted on our CSE servers, and can be accessed with your CSE username/password.
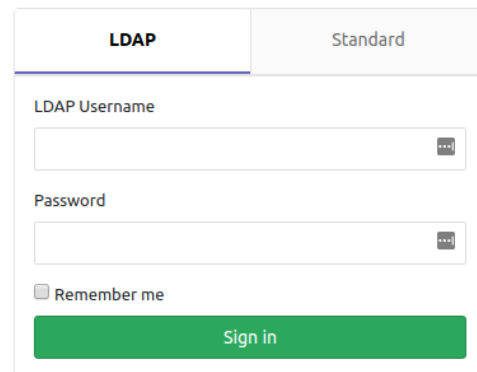

Gitlab Login

Point your browser to https://repo.cse.taylor.edu. You will see the Gitlab login screen:

Make sure you are using the LDAP login (it will prompt for LDAP Username), and type your CSE username and password into the fields.

Mattermost Login

Mattermost is integrated into our Gitlab installation, so you can use your Gitlab (CSE) login to access Mattermost. Point your browser to https://mattermost.cse.taylor.edu. You will see the Mattermost login screen (shown at right).

Choose "Sign in with Gitlab" which will present you with the Gitlab login screen (seen above). Log in as you would for Gitlab with your CSE credentials.
